

PAOLO KHOURY

Engineering Student – Materials, Mechanics and Energy

Palaiseau (91), France | +33 6 83 41 16 63 | paolok5@hotmail.com | [linkedin.com/in/paolo-khoury-452849297](https://www.linkedin.com/in/paolo-khoury-452849297)

EDUCATION

Polytech Paris-Saclay – Orsay, France **Sept 2025 – Present**

Diplôme d'Ingénieur, Materials Science (five-year programme, MEng equivalent), expected 2028

Specialisation in Materials, Mechanics and Energy. Coursework in metallurgy, polymers and composites, mechanics of materials, thermodynamics and characterisation techniques.

Polytech Montpellier – Montpellier, France **Sept 2023 – June 2025**

Integrated Preparatory Cycle (PeiP)

120 ECTS credits in physics, chemistry, mathematics, programming and sustainable development (DDRS).

Lycée Français MLF – Al Khobar, Saudi Arabia **June 2023**

French Baccalauréat, Mathematics and Physics-Chemistry specialities

Mention Très Bien (highest honours), 16/20 overall. Additional option: Mathématiques Expertes.

EXPERIENCE

Huazhong University of Science and Technology (HUST) – Wuhan, China **Apr 2027 – Aug 2027**

Incoming Research Intern, State Key Laboratory of Materials Processing and Die & Mould Technology

- Five-month placement in the laboratory's materials processing group, working on die and mould technology: metal forming, tooling design and process characterisation.

Oasis Ameron Ltd. – Dammam, Saudi Arabia **June 2024 – Aug 2024**

Quality Control & Laboratory Trainee

- Ran ASTM quality-control tests on epoxy coatings, resins and OA 9564 red oxide primer, covering viscosity, density and fineness of grind, and released batches against the tolerance sheets before delivery.
- Measured volume solids by oven evaporation at 105 °C followed by mass balance; that figure fed the theoretical coverage rates quoted to clients.
- Followed one OA 9564 primer batch through the full cycle, from raw-material weighing to high-speed dispersion and canning. It cleared QC on the first pass.
- Entered client orders and raw-material lots in Apex Pro (ERP) for full traceability, and kept the MSDS file current for every product handled in the lab.

ADDITIONAL

Languages: French (native), Arabic (native), English (C1), Spanish (B1).

Laboratory: Microstructural characterisation, hardness testing, adhesion and gloss measurement, viscosity and density measurement, ASTM test methods.

Software: Python, MATLAB, Apex Pro (ERP), Microsoft Office (Excel, Word, PowerPoint).

Industrial: Chemical safety and MSDS handling, lean manufacturing, sustainable development (DDRS).

Activities: Basketball, school and club level. Strength and conditioning six days a week.

International: Schooled in Saudi Arabia, engineering studies in France, research placement in China in 2027.
